

CSC Activity

CSC management arrives in Rokkasho this summer

On 29, August 2011, Mr. Jacques NOÉ, the Computational Simulation Centre (CSC) Leader, arrived at his place of work, Rokkasho. He was assigned as professional staff to the CSC of IFERC Project, and will manage the CSC as the Leader along with Mr. Shinji TOKUDA, the Deputy CSC Leader, who also arrived at Rokkasho this summer.

Setting up the CSC is progressing favorably in accordance with the project plan and to the schedule in order to start the CSC operation from January 2012. In July and August, the chiller units with piping and UPS (Uninterruptible Power Supply) units have been installed and they are now under testing.
